## (54) COSMETIC

## (57) Abstract:

PURPOSE: To obtain a cosmetic having excellent heat generation and its durability, capable of effectively warming skin and hair, having a good feeling in application by warm touch, excellent in activation of skin by promotion of blood circulation and in elimination of

stain on epidermis by extension of pores of the skin and heat.

CONSTITUTION: A substantially nonaqueous cosmetic comprises a polyethylene glycol having 200-1,000 average degree of polymerization, an active zeolite and a hydrophilic high polymer compound being slightly soluble in polyethylene glycol, and generates heat when blended with water.
